

Parallax

Parallax is an effect where the background content or image in this case, is moved at a different speed than the foreground content while scrolling.

Parallax Demo HTML

language-markup

```
<div class="parallax-container">
  <div class="parallax"></div>
</div>
<div class="section white">
  <div class="row container">
    <h2 class="header">Parallax</h2>
    <p class="grey-text text-darken-3 lighten-3">Parallax is an effect where the backgr
  </div>
</div>
<div class="parallax-container">
  <div class="parallax"></div>
</div>
```
